

PRO QUIP PLASTIC FUEL CANS & ACCESSORIES

PRO QUIP PLASTIC FUEL CANS & ACCESSORIES

MIDWEST PLASTIC FUEL CANS

FEATURES

- **All fuel cans** in the Pro Quip range comply with Australian Standard AS2906:2001. The distinctive red or yellow colouring of the cans is to reduce the possibility of using incorrect fuels.
- **The space saving** design of the plastic fuel can is very functional and it fits standard RV racks. The embossed pattern provides a slip resistant surface.
- **Pro Quip** Plastic Fuel and Water containers are Australian made from Food-Grade HDPE, and use the same spare parts which are available in retail display packaging.
- **Pro Quip Fuel cans** come with an internally stored pourer that will not get contaminated with dust etc. and pours freely without “glugging”, using the breather on the rear of the can.
- **Midwest Plastic Fuel Cans** are made in the USA and feature a distinctive cube design with larger capacity cans featuring dual handles for added safety and stability when pouring.
- **Midwest Fuel Cans** come complete with a child-resistant lid, and a self-storing/self-venting rigid spout which fits most automotive unleaded fuel tank apertures. Complies with Australian Standard AS2906:2001, Classified by Underwriters Laboratories.
