Agility™ Proportional Brake Control

- Fully digital settings for power level (gain) and sensitivity (response) make this the easiest brake control to set and the most reliable in use after use.
- On-the-fly sensitivity adjustment: 5 preset options for optimal control from the touch of a button
- Easiest to adjust setting for full and empty loads, or changeable weather conditions
- Easy to read digital power scale from 5-99%
- Will apply trailer brakes while in reverse
- Advanced inertia accelerometer technology instantly activates brakes
- Advanced proportional controller mirrors braking action of the tow vehicle
- Flexible mounting options
- Easy Plug-In quick disconnect feature for sharing between vehicles or storing between uses
- Up to 6 brake capacity
- Innovative vertical slide is easier to see and use than traditional horizontal slides
- Short proof protected
- Error code indicates a short
- **Lifetime warranty!**

HOPPY TRAILER BRAKE CONTROLS

Reduce Your Stopping Distance!

Towing large trailers hinders your ability to stop quickly. Protect and control your trailer and vehicle investments with Hopkins™ trailer brake controls. Hopkins™ trailer brake controls send an increasing amount of power to the trailer brakes the longer the brake pedal is pressed. (Most state laws require the use of electric brakes on all trailers weighing over 2,000 kilograms.)

- For 2, 4 and 6 brake systems
- 100% solid state electronics
- All necessary mounting hardware included
- **Lifetime Warranty!**

Impulse™

- Short-proof protected
- Lifetime warranty
- Easy to install and simple to use
- Powers up to 6 trailer brakes
- Digitally displays the exact braking power
- Mounts and operates at any angle

DISPLAY FEATURE:

- DIGITAL, numerical from 5% to 99%

BRAKE POWER LEVEL:

- Set the exact percentage of power you desire

SHORT-PROOF PROTECTION:

- From trailer brake wire shorts
- Error codes indicate a short AND identify type of short.
