

Say 'Goodbye' to Flat Tyres Forever!

# AmerSeal<sup>®</sup>

SIMPLY THE BEST TYRE SEALANT IN THE WORLD!

## THE ULTIMATE HEAVY DUTY Tyre Sealant

**AmerSeal** can be used in any air-filled tyre: from heavy duty power equipment, highway or offroad vehicles, down to bicycles and wheelbarrows.

- **WILL PREVENT FLATS**

A unique product that permanently seals tread area punctures up to 6mm for the life of the tyre, larger punctures will normally seal in heavy ply tyres.

- **WILL SAVE FUEL**

Will completely coat the inside of the tyre. This coating seals the tyre against all slow air leaks and helps prevent fuel-burning under-inflation.

- **WILL EXTEND TYRE LIFE**

Under inflation is the #1 tyre killer. By maintaining proper air pressure, a tyre will generate much less heat due to excessive flexing and friction causing the tyre to run much cooler and last much longer.

- **WILL PREVENT CASING DAMAGE**

This excessive friction and heat build up due to under-inflated tyres does permanent damage and can also cause tyre failure. Premium heavy duty tyre sealant helps by maintaining proper air pressure to prevent casing damage.

- **WILL REDUCE DOWNTIME**

Premium heavy duty tyre sealant saves you from expensive machine and operator downtime by keeping your equipment rolling. Premium heavy duty tyre sealant is a must in any preventative maintenance program.

- **WON'T HARM TYRES OR WHEELS**

Sealing action is completely mechanical, there is no chemical reaction that might harm the tyre or cause corrosion on the wheel.

- **WILL STAY IN PLACE**

Will not migrate to the bottom of the tyre when the vehicle is stationary. Protection is permanent.

- **WILL NOT SEPARATE**

Remains effective for the life of the tyre.

QUIP**

\* Permanent Tyre Repair

\* Tyre Life Extender

\* Flat Prevention

# FACTS:

- Seals 6mm punctures in tread area
- Seals larger punctures in heavy ply tyres
- Seals most bead and rim leaks
- Works in any air filled tyre
- Highly effective for the life of the tyre
- Works continuously
- Helps maintain constant tyre pressure
- Extends tyre life
- Provides better fuel economy
- Does not void tyre warranty
- Effective from -43°C to over 95°C
- Tyres run up to 30°C cooler, provides a cooling effect
- Works in high and low pressure tyres
- Works in high and low speed tyres
- Formulated for tube or tubeless tyres
- Will not adversely effect balance when properly installed
- Stays pH neutral for life of the tyre
- Will not rust, corrode, or pit steel or aluminium wheels
- 100% water soluble - easy clean out for recapping
- Completely homogeneous
- Content never separates
- Indefinite shelf life, no mixing required
- Ships worldwide as a NON-Hazardous material
- Non-explosive, non-flammable
- Meets EPA standards for disposal by municipal sewage systems
- Works with most low tyre pressure indicator sensors
- Not recommended for use with low tyre pressure equaliser systems
- Not to be mixed with fluids, balancing powder, or any other sealants.

**\*Easy to Install**

**\*All bottle sizes include installation tools under cap**

**\*All pumps include valve core remover**

**AmerSeal** is installed through the valve stem after the valve core is removed. **AmerSeal** remains liquid inside the tyre seeking out any area of air-loss for the life of the tyre. When a puncture occurs the escaping air pressure, constant flexing, and centrifugal force propel the fibres and particulates into the puncture. The hole is packed with these solids, which form into a permanent, flexible seal.

When your income depends on tyres that must be moving... You can depend on **AmerSeal**.

\*If needed all high speed over-the-road tyres should be balanced before applying.

# AmerSeal<sup>®</sup>

Manufactured in the USA by American Sealants Company

**Part #2600**  
**AmerSeal 500ml Bottle**

**Part #2601**  
**AmerSeal 1 Litre Bottle**

**Part #2602**  
**AmerSeal 20 Litre Pail**

**Part #2611**  
**AmerSeal Installation Pump**  
(For use with 20L Pail)

**Part #2604**  
**AmerSeal 208 Litre Drum**

**Part #2605**  
**AmerSeal 1040 Litre Tote**
