Re: AmerSeal useage on LOPE 2006 Kimberley Trip

Dear David and Martin,

I am writing to let you know how delighted I am with your AmerSeal Tyre Sealant Product. We have just returned from the LOPE 2006 Kimberley Trip with Ron Moon and Co, and after travelling 12,000 kms on some of the roughest roads imaginable, and with ambient temperatures into the high 40's, we did not incur one puncture, even though there were 16 punctures across the rest of our group.

We fitted a brand new set of Mickey Thompson Baja Claw tyres to our 100 Series Land Cruiser for the trip, and prior to departing Melbourne applied AmerSeal to all four wheels. After seeing the roads that we had to drive on (which included the Gibb River Road, Mitchell River Plateau Track, Tanami Track and even driving through a bush fire where the track was covered in flames) I was absolutely delighted that we had made the effort. The surface on these roads included corrugations, ruts, jagged rocks and extremely sharp stones that constantly tore away at our tyres, so much so that our right rear tyre had to be thrown away when we returned home due to tears, gouges and puncture marks.

On inspection of the tyre after removing it from the vehicle, AmerSeal was visible oozing from various points on the tyre, further proof that the product did its job and assisted us in having a puncture free, and therefore stress free trip.

I will have no difficulty whatsoever in recommending AmerSeal to anyone looking for a thoroughly efficient tyre sealing product, and one that truly lives up to the manufacturers specifications.

I have attached a few photos for you of some of the country that we travelled through during our trip.

Yours sincerely,

Alan Johnson
