METAL JERRY CAN

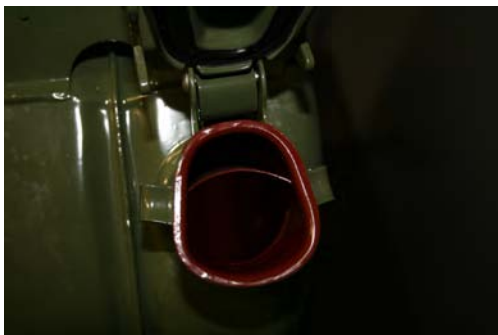

CHINESE COPY METAL JERRY CAN

Petrol Resistant Inner lining covers entire inside of can, breathing channel and neck.

Welded areas perfect inside the can.

Lid securely attached to neck.
Can't be bent out of shape.
Passes AS2906 drop tests.

Inner lining does not cover breathing channel or neck. Beware of rust.

Welded areas melt internal paint and leave exposed bare metal.

Lid moves freely in vertical motion,
reduced sealing ability.
