

TESTING INSTRUCTIONS: HOW TO TEST THE FEMALE CHARGING PLUG OF A 24V BOOSTER

- On the front side of your 24V Booster you will find the female charging plug.

- Insert the charging plug tester into the female charging plug, and turn to the right (as per the red arrow), to turn it on.

IF THE LIGHT SWITCHES ON:

- Your female charging plug and the charging circuit are working perfectly.

IF THE LIGHT DOES NOT SWITCH ON:

- a One or both poles of the female charging plug are blown.
- b A cable between the battery and the female charging plug is disconnected or blown.
- c The batteries are completely discharged (zero volts).
